Teaching, Learning, and Technology in WJCC Schools

September 1, 2026

Superintendent's Transition Plan

Priority Action Steps (November 2025 – June 2027)

United in Purpose, Inspired by Possibilities

TIC

Review Student Screen Time with a Focus on Purposeful Integration

Conduct a division-wide review of student screen time to ensure that digital tools are integrated purposefully. The emphasis will be on using technology to enhance meaningful learning rather than relying on passive or low-impact digital activities.

A Year in Review

Nov. 2025

Supt. transition plan is released with call for screen time review

Jan - June 2026

Mixed methods data collection and review

June 2026

Teaching, Learning, and Technology presentation to School Board

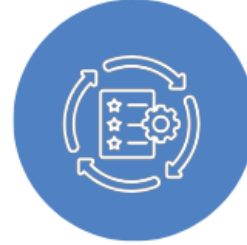

June 2026

Engage with Us open for interest in participation on Instructional Technology Focus Group

July 2026

Two sessions of Instructional Technology Focus Group

Aug. 2026

Review of recommendations; preservice professional learning on instructional design

June Action Steps

- Create an instructional technology focus group
- Continue to provide professional learning
- Launch a campaign for engagement in Lightspeed Parent Portal (Fall 2026) to maximize family utilization.
- Formalize and strengthen expectations for device use in the classroom
- Continue to integrate digital citizenship principles in lessons K-12

June Action Steps, cont.

- Continue instructional walk-throughs for actionable feedback regarding observed technology use
- Continue to provide opportunities for physical activity throughout the day
- Engage with students, parents, and families to support a healthy balance of physical and digital activity

Instructional Technology Focus Group

What We Heard

There is a need for more consistent technology expectations, use, and integration practices across schools and classrooms.

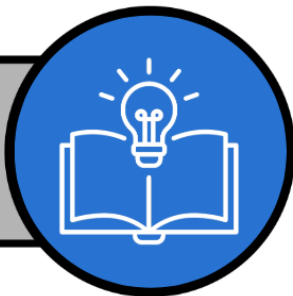

Purpose Statement

In WJCC schools, instructional technology is intentionally integrated into lessons to strengthen learning — not an end in itself.

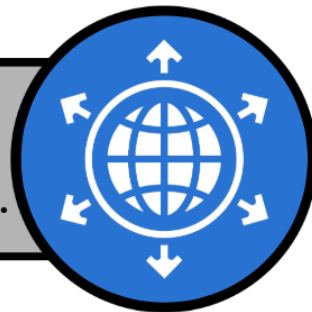

Technology is used to advance clearly defined learning goals, meet students' developmental needs, expand access, increase meaningful participation, and/or offer timely feedback.

Guiding Principles for Technology Integration

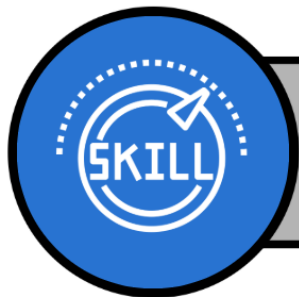

Learning comes first.

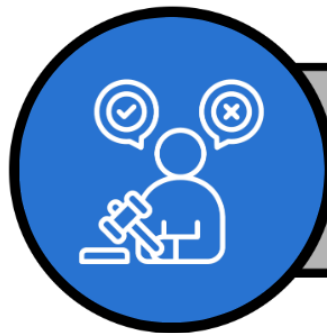

Technology expands learning opportunities.

Strong foundations are essential.

Intentional technology integration requires professional judgement.

Learning Comes First

- Technology strengthens, supports, and expands learning opportunities.
- Learning goals must guide technology selections.
- Technology use is not an end in itself.
- Technology should strengthen authentic learning experiences.
- Students must develop critical thinking skills

Strong Foundations are Essential

- Technology use should strengthen, not replace, foundational elements of effective teaching and learning
 - Strong foundational academic skills
 - Age and developmental appropriateness
 - Human relationships
 - Digital Citizenship skills

Strong Foundations are Essential

Skills Before Tools

Grade Band Technology Guidance

K-2	Learn the skill	Modeled and guided
3-5	Practice the skill	Structured use
6-8	Apply the skill	Guided independence
9-12	Lead with the skill	Life-ready application

Technology Expands Learning Opportunities

- Valuable when used for experiences that would otherwise be difficult, less accessible, or impossible to provide.
 - Authentic learning experiences
 - Meaningful student engagement
 - Expanded access to information
 - Multiple pathways to learning and demonstration of understanding
 - Preparation for an evolving world

Intentional Technology Integration Requires Professional Judgement

- Requires an intentional instructional decision-making process
- Purposeful planning
- Intentional tool/resource selection
- Equitable access
- Clear, proactive communication with families
- Flexibility to respond to student needs

What We Heard

*Understanding and support
for intentional
implementation of
technology is needed on an
ongoing and consistent basis.*

Preservice Professional Learning

- Elementary Curriculum Updates
 - Emphasis on intentional instructional design, including use of technology
 - Clear expectation that technology is to be used for learning and not recreation
- Technology Integration Principles
 - Led by Technology Integration Coaches at each school
- Secondary choice sessions
 - Specially Designed Instruction
 - Executive Functioning
 - Balanced Learning

Coaching and Collaboration

- Coaching to support intentional resource integration and lesson planning
- Collaboration for co-planning, co-teaching, reflection, and revision
- Support digital citizenship lessons and inclusion of digital learning integration and computer science standards

What We Heard

*Technology integration
resources, practices,
expectations, and utilization
must be data-driven and
research based.*

Virginia Association of Elementary School Principals Position Statement

- Technology access should follow a developmentally appropriate progression:
 - Grades K–1: Shared devices used purposefully while prioritizing hands-on and social learning.
 - Grades 2–5: Individual device access used intentionally and under teacher direction to support learning.
- Establish clear expectations for safe, purposeful, and age-appropriate technology use
- Retain flexibility to respond to differing student and school needs

Guidance from the US Dept. of Education

- Recreational technology and educational technology should not be viewed as synonymous
- Does the technology we ask teachers and students to use improve learning and student academic outcomes?
- Technology should remain a tool in service of learning – not an end in itself
- Focus on educational value rather than screen exposure alone
- Educational technologies should be educator-led, ethical, accessible, transparent, and protective of student data

Instructional Technology Resource Index

Instructional Technology Approval Levels

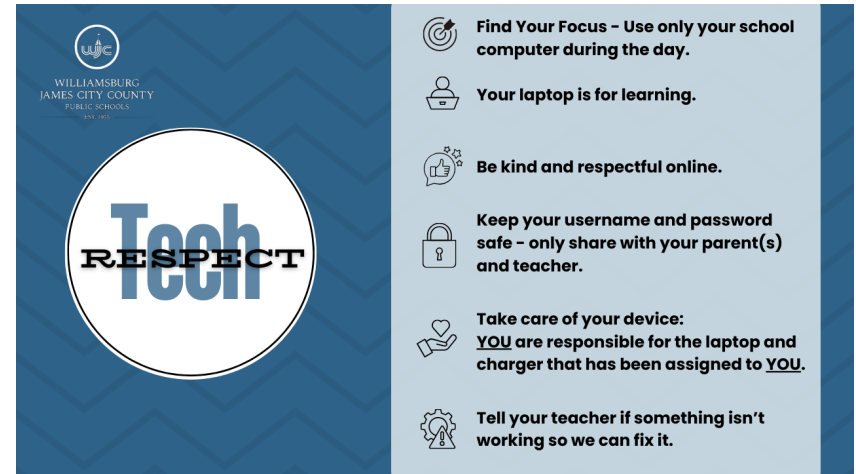

What We Heard

Students are distracted and accessing websites that they shouldn't be while in class.

Digital Citizenship and Device Management

- Digital citizenship lessons
- Reminders about device use expectations
- Filter & Firewall
 - Reviewed and updated on an ongoing basis
- Lightspeed Classroom

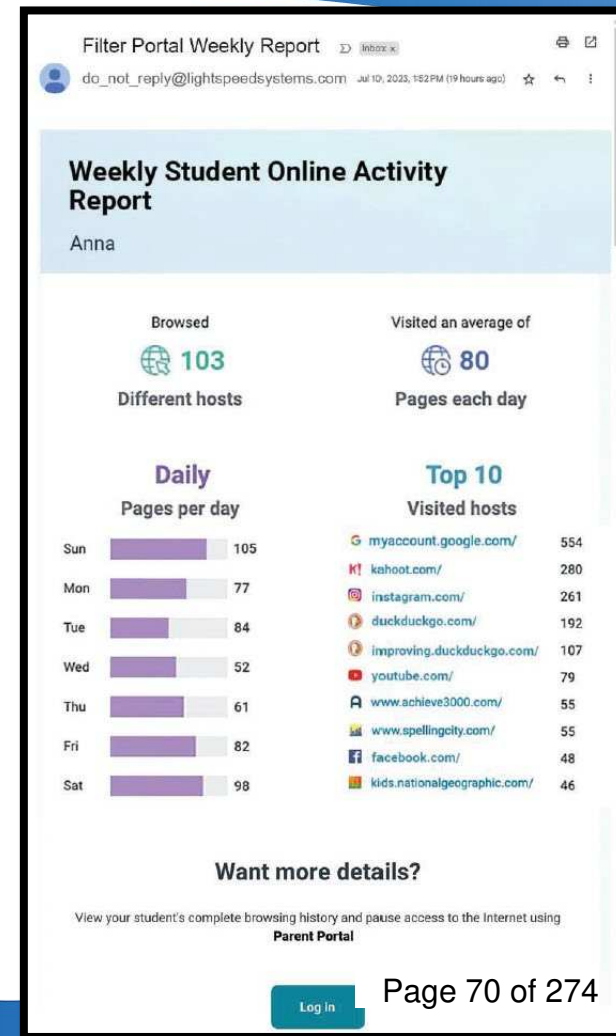

What We Heard

Parents and community organizations want to be involved, informed, and engaged with technology platforms used for teaching and learning.

Community Communication

- Updated WJCC website
- Lightspeed Parent Portal
 - Monitor overall web activity, screen time, and device use
 - Manage at home use of WJCC devices
 - Allow or block websites
 - Limit internet access, set use schedules
 - Manage website categories
 - Manage YouTube

Supporting Kids in the Digital World

- Format:
 - General session
 - Two Choice Sessions
 - Exploring elementary applications
 - Supporting secondary students in Canvas
 - Parent Platforms
 - Digital citizenship and managing technology at home
 - AI at home

What We Heard

*The work is just beginning.
How will resources, practices,
and implementation be
monitored, improved, and
communicated?*

Commitment to Improvement

1 ENGAGE & PREPARE		2 GATHER EVIDENCE	3 ACT ON FINDINGS
WHEN	MILESTONE	WHAT HAPPENS	PHASE
SEP 1	School Board Update	The School Board receives a focus group update and plans for continued collaboration.	GATHER EVIDENCE
FIRST SEMESTER	Digital Citizenship	Technology Integration Coaches and classroom teachers engage students in lessons that reinforce responsible digital citizenship in schools.	ENGAGE & PREPARE
	Coaching & Collaboration	Technology Integration Coaches support intentional resource integration and lesson planning through job embedded professional learning, co-planning, co-teaching, reflection, and revision.	ENGAGE & PREPARE
	Parent Engagement	Lightspeed Parent portal available to all WJCC parents to monitor student use of WJCC devices.	ENGAGE & PREPARE
	Parent Engagement	Update WJCC website to provide parents with information for instructional technology tools.	ENGAGE & PREPARE
	Family Academy	Sessions designed to engage families in gaining knowledge and strategies to support children in a digital world.	ENGAGE & PREPARE

Commitment to Improvement

1 ENGAGE & PREPARE		2 GATHER EVIDENCE	3 ACT ON FINDINGS
WHEN	MILESTONE	WHAT HAPPENS	PHASE
FIRST SEMESTER	Instructional Walkthroughs	Principals, coordinators, coaches, and teachers collect evidence of instructional tools and technology use in classrooms.	GATHER EVIDENCE
	Surveys	Students, families, and staff provide feedback about their experiences with instructional tools and technology.	GATHER EVIDENCE
	Instructional Audit	The division evaluates the use of high-quality instructional materials and tools—including technology—to identify opportunities to strengthen student achievement.	GATHER EVIDENCE
	Student Voices Tour	Students share feedback about their experiences with instructional tools and technology.	GATHER EVIDENCE

Commitment to Improvement

1 ENGAGE & PREPARE

2 GATHER EVIDENCE

3 ACT ON FINDINGS

WHEN	MILESTONE	WHAT HAPPENS	PHASE
WINTER 2027	Instructional Technology Focus Group Meeting #3	Convene the focus group to review Lightspeed data, classroom walkthroughs, and stakeholder feedback.	ACT ON FINDINGS
	Findings, Recommendations & Next Steps	The School Board reviews audit recommendations and a technology update informed by Lightspeed data, classroom walkthroughs, and stakeholder feedback.	ACT ON FINDINGS
