

Agenda Item Details

TOPIC:

Instructional Technology Focus Group Update

BACKGROUND:

In October 2024, the school board approved the realignment and updating of the Strategic Plan, *Elevate Beyond Excellence Bridge to 2028*. In support of this plan, the Superintendent's Transition Plan includes Initiative T1C which is a Review of Screentime with a Focus on Purposeful Integration as part of the Key Priority: Academic Achievement, College and Career Readiness, and Educational Equity.

RATIONALE:

The Superintendent's Transition Plan supports the division Strategic Plan through defined initiatives with progress reported to the school board. A focus group of 55 participants representing the School Board, division leaders, school-based administrators and staff, parents, and community members met twice in July 2026 to develop a shared vision and guiding principles and consider best practices for the appropriate, effective use of instructional technology. The focus group's findings and recommendations have been shared with school division leaders.
